SUMMARY

Enthusiastic Software Developer skilled in HTML, CSS, JavaScript, and Python, with experience in Django and Flask. Proficient in Object-Oriented Programming (OOPs) concepts and Data Structures & Algorithms (DSA), with a solid foundation in building efficient, scalable solutions. Developed a responsive multi-participant call app, an 82%-accurate Speech Emotion Recognition system, and a task-automating desktop assistant. Recently ventured into the PLM domain, gaining hands-on experience in installation, BMIDE, usage, and AWC configuration. Passionate about solving real-world problems with technology.

EDUCATION

Prof. Ram Meghe Institute of Technology and Research, Badnera
Bachelor of Engineering (Information Technology) | CGPA – 8.14

2020 – 2024

Nagar Parishad Jr. college, Chandur Bazar
Maharashtra State Board (HSC) | Percentage – 66.31%

2018 – 2020

G. R. Kabra High School, Chandur Bazar
Maharashtra State Board (SSC) | Percentage – 87.40%

2012 – 2018

SKILLS

- **Programming Languages :** C, C++, Python, Java, HTML, CSS, JavaScript.
- **Framework and Libraries:** Django, Flask, Bootstrap, ReactJS.
- **PLM Skills:** Installation, BMIDE, Usage, AWC Configuration.
- **Soft Skills:** Problem Solving, Collaboration & Teamwork, Productivity & Efficiency, Adaptability

PROJECTS

CallNexa:

- Integrated Built and managed an audio and video call app with HTML, CSS, and JavaScript. Made sure the app works well on all devices.
- backend functionality with Django framework and Bootstrap for seamless real-time communication and an optimized user experience across various devices.
- Collaborated on code optimization and scalability to enhance performance and user engagement, while adhering to best practices for maintainability.

Speech Emotion Recognition:

- Developed a Speech Emotion Recognition system with 82% accuracy using Machine Learning, JS, HTML, CSS, and Flask.
- Implemented data preprocessing, model training, and integration into a web application for real-time emotion detection.
- Created a user-friendly interface and built a Flask backend server for seamless communication and inference.

PLM EXPERIENCE

July 2024 - Present

- **Installation:** Gained expertise in setting up and configuring PLM environments to support business requirements.
- **BMIDE (Business Modeler Integrated Development Environment):** Worked on creating and managing data models, business objects, and custom configurations.
- **Usage:** Learned to navigate and utilize PLM tools for data management, process automation, and collaboration.
- **AWC (Active Workspace Configuration):** Customized and configured Active Workspace for streamlined user interaction and enhanced functionality.

CERTIFICATIONS

- Certification Course in LinkedIn Learning – Django Essentials.
- Certification Course in C++ - Coding Ninja
